Backend: Laravel,Ruby on Rails

Database: MySQL

Tools: Git,Github,VsCode,Postman

Project Management: Kanban,Agile Methodology

PROFESSIONAL EXPERIENCE

Technorio Inc. | Software Developer Intern

June 2025 - October 2025

- Built small web applications using Laravel and Livewire
- Contributed to company's multiple projects using Livewire and Laravel
- Worked on company's in-house project using React

Chulo Solutions | Software Developer Intern

March 2024 - July 2024

- Built multiple self-project applications using React and Ruby on Rails
 - Worked on a company web application using React.js.
 - Developed and maintained mobile application features using React Native.
-

PROJECTS

Job Tracker System

React.js,Laravel,MySQL

- Built a full-stack job tracking application to manage job applications efficiently.
- Features include job application tracking, status updates (applied/interview/offer/rejected), interview scheduling with notifications, authentication, and a responsive dashboard using React with a Laravel backend API.
- Redux for managing job and interview state across multiple components (boards, forms, dashboards)

https://github.com/krimamadhikarmi/tracker_backend

CampusBridge

React.js,.NET

- Developed a web application to streamline academic management for students.
- Key features include user authentication, course management, performance tracking, and feedback submission, with a React frontend integrated with a .NET backend for seamless data handling.

Github: https://github.com/krimamadhikarmi/CampusBridge_frontend

PROJECTS

FoodWebsite

React.js

- Developed a responsive food website focused on traditional sweets, featuring an attractive UI, product listings, and smooth navigation. Built using modern web technologies with emphasis on user experience, clean design, and mobile responsiveness.

Movie Review Website

React.js

- Built a responsive Movie Review web application using React that allows users to browse movies, view details. The project demonstrates component-based architecture, API integration, and state management with a clean and interactive UI.
